Your Product Moving!**

## Step Feeders

The Performance Feeders line of step feeders are manufactured to operate quietly with an air-powered operating system, durable machined steps, and gentle part handling.

## Features

- Two sizes to choose from, offering feeding solutions for a variety of part sizes and space requirements
- Multiple step widths available
- Quiet operation
- Gentle handling of parts being fed
- Ideal for cylindrical, spherical and simple geometry parts
- Space-saving vertical design reduces the overall equipment footprint
- Integrated hopper bin
- Durability: The simple linear motion of the step and the non-abrasive interaction with the parts being fed ensure that the Step Feeder will operate for years with minimal maintenance

## Options

- Step materials: Steel, Delrin, Stainless steel or Aluminum
- Purchase as a turnkey system or as a stand-alone unit providing cost savings by allowing the purchaser to value-add
- Advanced HMI powered control panel available

## PFSM

- 216 cu. in. integrated stainless steel hopper
- 1/2" or 3/8" step width
- Double acting solenoid valve and I/O block included, unmounted

## PFS1

- 1/2 cu. ft. integrated stainless steel hopper
- 1", 3/4" or 1/2" step width
- Double acting solenoid valve and I/O block, mounted internally
