# Container Unscrambler

Patent # 11021286

PFI Container Unscrambler with hydraulic driven dumper

The Performance Feeders Container Unscrambler is designed with efficiency in mind, orienting 100% of the product with no recirculation. Its vertical stacked footprint reduces the amount of floorspace required to achieve rates from 100 to 500+ parts per minute (machine size and rates are determined by product features.) The standard Performance Feeders Vertical Elevator or other various product storage equipment can be integrated into the system to further enhance the productivity of assembly operations.

## Specifications

- Feed Rate: 100 - 500 Parts per minute
- Feeds a variety of containers sizes
- Voltage: 220V, 60Hz
- Structure: Stainless- steel build with clean room design
- Smaller overall system footprint

Ideal applications: bottles, jars, tubes, vials, eye dropper bottle

## Features

- FDA compliant contact surfaces available
- Custom hopper storage capacity
- PFI custom elevator carries product to the orienting equipment

## Sort And Orient Parts At A Faster Rate
